

WEEKLY RESEARCH - FOREIGN EXCHANGE

Date ending: 14 February 2014

INTERPRETATION: The tables below combine several indicators to summarise our view on individual currencies. Price Location is a primary determinant and defines the current price relative to major long term Support/Resistance levels. If the current price is above/below the reference level it is known to be in a strong/weak price location. This is helpful in assessing the value of current Momentum and Relative Strength readings measured over Medium and Short term time periods. Ideal trades arise when both elements concur.

PRICE LOCATION	Indices		FX Pairs							
	This Week	Last Week	v AUD	v CAD	v CHF	v EUR	v GBP	v JPY	v NZD	v USD
