FOREX REPORT

WEEKLY RESEARCH - FOREIGN EXCHANGE

Date ending: 29 August 2014

INTERPRETATION: The tables below apply three separate filters to summarise the likely future direction for a given currency. Price location defines the current price relative to major long term support/resistance levels. If the current price is above/below the long term reference level we would view this to be in a strong/weak price location. This is helpful when comparing the shorter term indicators based on a currency's momentum and relative ranking. Applying a "Top Down" approach it is hoped the reader will be able to interpret the data easily and can use this data to determine the likely future direction and potential value of a chosen index or currency pairs trade.

	Indi	ices	FX Pairs
